  - ESD Management (Trigger 4) Report
  - MIL-STD-129P Compliance (DD1348-1A)

U.S. AIR FORCE

# More Flexible ASL Management

## ■ Current Process

- Requires IM Approval Record in GOLD
- Base Transactions Sent to MILS Suspense if No IM Approval Record Found

## ■ New Process

- ICP May Authorize Processing of Base Transactions in Advance of Receipt
- Authorization may be Made by Base
- Facilitates ASL Processing during Initial Deployment of the Weapon System or Special Operating Situations

U.S. AIR FORCE

# Enhanced RBL Processing

## ■ Current Process

- Stock Number and Quantity Validated
- I&SG Information not Validated

## ■ New Process

- I&SG Information Validated following AF Policy
- Automatic Correction Option will be Available
- Transaction will be Sent to MILS Suspense if I&SG Information is Incorrect and Automatic Correction not Authorized

U.S. AIR FORCE

# Improved AF Catalog Registration

## ■ Current Process

- SNUD Registration for All Authorized Stock Numbers (NSN, NC, ND And K Numbers)

## ■ New Process

- SNUD Registration Option for Specific Source or Sources of Supply
- SNUD Registration Option by Specific Service Manager or Managers

U.S. AIR FORCE

# Automated GOLD Catalog Update

## ■ Current Process

- Manual process requires identification of data elements at the stock number level

## ■ New Process

- Automated capability to update GOLD catalog data elements from AF catalog transactions

U.S. AIR FORCE

## Other ICP MILS Improvements

- ESD Management (Trigger 4) Report
  - Optimized Record Selection Process
  - Option to Review Specific MILS Profile
